DESIGN PRINCIPLES IN USE ON MY SITE;

- Symetrical layout
- Vertical symetry
- Colour contrast
- Size contrast

Whole web site is made to be symetrical, it´s a mobile site, and that is the main reason why I decided to use this approach, It makes the site very clean and simple to use.

Colour contrast on site is obvious, black is main colour and red, yellow and blue make a big contrast to it, by using this colours I made it simple for a user to recognise different segments of the site.

Size contrast is mostly in font size; headings, subheadings and text.

USABILITY RESULTS;

I tested my page on 4 users, and only one of them mentioned that it would be useful if I had a navigation bar on every page of my site.

All 4 candidates sad that navigating through the site is easy and simple.

There were no other suggestions or problems so I think there is no need for any changes.
